

ILF 600

- The Hydac In-line Filter model ILF is an all-cast construction and is made from superior grade castings.
- The maximum flow capacity is 600 LPM with fluid viscosity of 80 SSU at 40° C.
- These filters are rated for working pressures upto 20 kg/cm.
- The port connections range from 2" BSP to 3" BSP SAE flange.
- Filter element is available in Stainless steel wire mesh or high impregnated paper filter and 25 microns filtration are standard (Optional is 10 microns).
- Strong ferrite magnets are provided inside the cartridge flow path to arrest ferrous particles. Adequate internal area is provided to minimize pressure drop.
